Central Michigan Regional Rural Health Network

2019 – 2020 Health Network Development Planning Overview

June 6, 2019
Health Network Planning Goals

1. Plan to develop the Network infrastructure capacity

2. Plan to develop increase systems capacity to provide integrated treatment, care, and programming specific to individual needs

3. Plan to increase the number of individuals accessing available capacity

**Objective 1.** Conduct Network infrastructure development planning activities that encourage multisector, collaborative partnerships that address identified community health needs and facilitate access by community members to health and human services that meet individualized needs.
Objective 2. Plan for the development of trauma informed systems and resilient communities.

Objective 3. Plan to develop systems capacities to provide harm reduction based care for people who misuse substances and those impacted by substance misuse.
Objective 4. Plan to increase workforce capacity by expanding and extending the reach of regional health professional workforce education, training, recruitment, and retention activities within the region.
